

Product Data Sheet

Sentinel Lite Access Control Management Software

Sentinel Lite is an easy to install and operate access control software package from Morley Electronics. Sentinel Lite is designed for the Sentinel range of controllers, to enable PC control of Sentinel systems locally and remotely via dial-up* modem and network connection. Sentinel Lite can be added to an existing Sentinel system to allow remote addition and deletion of tokens simply and easily. Sentinel Lite also features extensive search and reporting facilities to greatly enhance the flexibility and power of the Sentinel range of controllers.

*to be included in a future release

Sentinel Lite Software Features

- Easy, simple software with 'Outlook' screen appearance
- Standard PC operation with W95/98/2000/ME/NT. No IT experience necessary
- Auto loading, easy to use wizard based system configuration

- Extensive history transaction log and search/report printing with data export
- Full on-screen contextive help facility
- Local COM port, Dial-up* and LAN connection options for up to 4 Sentinel networks
- Local/remote Sentinel system operation & configuration

* Future Release

System overview

Sentinel Lite is provided on a CD-ROM with an auto load feature. Installers and users do not need IT experience to install and operate Sentinel Lite, but will benefit from the extensive features on offer.

Sentinel Lite uses a Microsoft Outlook appearance, with program icons and menus to aid the installer and user. Sentinel Lite extends the value of the Sentinel controller range by enabling multiple systems to be connected to a PC for local and remote control, including system configuration and addition/deletion of cards and users, as well as the generation of event reports.

Sentinel offers the following outline specification;

- PC operation
- Auto loading facility
- Wizard network programming
- 4,000 users
- 1000,000 event history file
- Unlimited user access profiles
- Selectable password access rights
- Multiple Sentinel network connections
- COM port, Dial-up* and LAN networking options
- User addition/deletion and sort options
- Full history and event reporting file export

Technical Specification

PC Minimum Specification

- Pentium PC 200MHz Processor
- 32 Mb RAM
- 200 Mb free space on HDD
- VGA 800x600 pref. 1024x768

Input/Output Specification

- Maximum 4 clean contact inputs per controller
- Maximum 4 x 1A relay outputs per controller
- Point and click input and output configuration on each controller
